

POLYMER SYSTEM SUPPORT code 84590

Injection moulded for durability and toughness Only 3 kg

REINFORCED CONCRETE SYSTEM SUPPORT SLABS

Standard Type

Heat Pump Type

EVERHARD Hot Water System Support Slabs comply with requirements of AS/NZS 3500.4:2003 for outdoor placement of water heaters not requiring safe trays in Australian domestic applications. Support Slabs MUST be installed on levelled, stable, compacted bedding material not liable to movement or subsidence. Support Slabs are NOT intended to be placed over voids.

POLYMER Supports must be placed on level, stable, raised paving, plinths or slabs, so that the top is not less than 100mm above the surrounding ground surface, to meet the installation requirement.

Concrete Product codes	A	B	C	Weight kg
