CASE STUDY

PROJECT OVERVIEW

Date of Installation: May 28, 2024

Duration: 6 hours

Location: Taralga, NSW 2580, Australia

ARW Multigroup was selected to install a residential wastewater treatment system in Taralga, NSW. Taralga, located in the Southern Tablelands of NSW, experiences an oceanic climate with hot summers and frequent nighttime frosts in winter. These weather conditions challenge any outdoor product, so consumers and installers must choose products that can endure the Australian climate. Another consideration for wastewater system installers is partnering with a supplier who is reliable and accessible at all stages of the installation and post-installation. This ensures any challenges can be addressed immediately and worked through collaboratively between all parties.

"The installation of the Aqua Advanced Unit by Martin Jewell and his team at ARW Multigroup Pty Ltd demonstrates the product's effectiveness and the importance of excellent customer support. This successful experience underscores why Aqua Advanced continues to be a trusted name in the industry"

CHALLENGES

Frequently, these regional installations present challenges for installers, such as difficult-to-reach locations or unfavourable weather conditions. Fortunately, this particular project proceeded without any complications. Martin expressed his satisfaction with the Aqua Advanced Unit, indicating his willingness to use it again in the future. The blend of exceptional customer support and dependable product performance has established Aqua Advanced as a top choice for ARW Multigroup Pty Ltd. The seamless experience and positive outcomes have solidified their preference for this solution.

INSTALLER PROFILE

Installer: Martin Jewell

Company: ARW Multigroup Pty Ltd

Martin Jewell, from ARW Multigroup, explains his primary goal when selecting which system to use was to find a reliable supplier who could provide excellent customer service and assistance with installation. This was crucial for ensuring that their employees could fully understand what was involved and how to efficiently install these systems. Martin's decision to select the Aqua Advanced unit was significantly influenced by the positive experience with James Huggett, their Everhard Representative. James's expertise, helpfulness and combined with his plumbing background provided Martin with the confidence needed to choose Aqua Advanced for this project.
